- Safe to use
- Holds logs and timber 25 to 230 mm dia and any length
- Weighs only 12 kg
- 2 years guarantee

AGMA

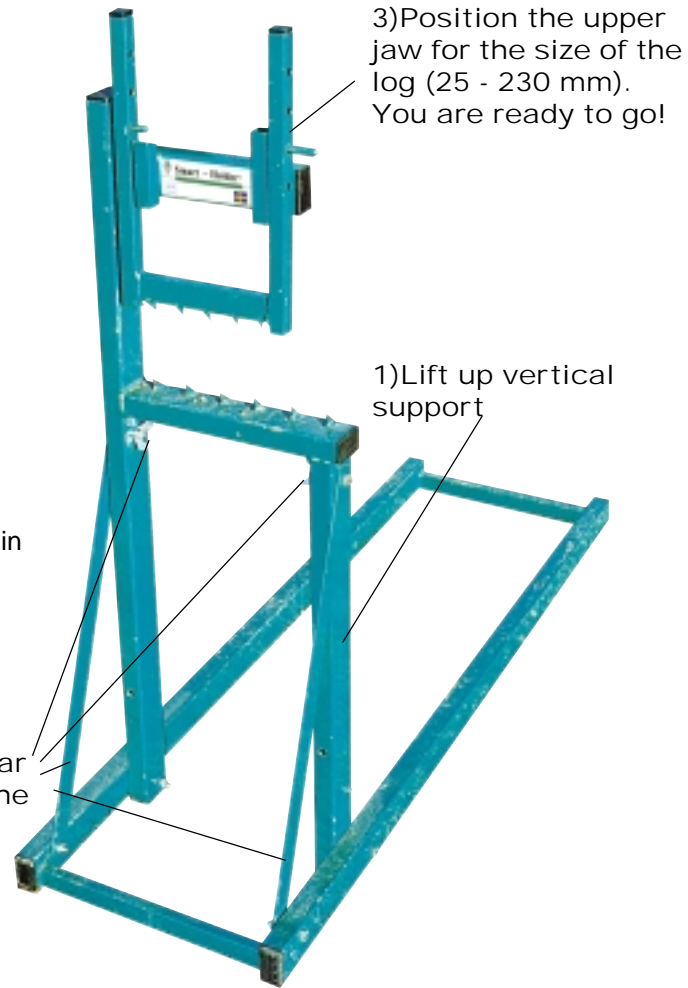

Smart-Holder, the sawhorse you've been longing for...

Smart-Holder folds flat and is easily portable. The folded size is 1180x380x50 mm and the weight is only 12 kg.

Slide the log in between the jaws and press it down so the claws bites in the log. Now you are ready to cut.

Always start to cut the log outside the frame, first at a and then at b.

Always position the log towards the vertical support. When you saw, stand on the same side as the vertical support. Push the body of the saw towards the log when you cut.
